

Mr. Yuxiao Ye

yuxiaoye@bit.edu.cn | +86 18519112663

Research Interests: (Multi-Agent) Deep Reinforcement Learning; LLM-based Agents (Code Generation, Text-to-SQL)

EDUCATION

Beijing Institute of Technology (985 project university) **2022.09-Present**
MSc in Computer Science and Technology Supervisor: Prof. Chi (Harold) Liu, *FIET, FBCS* GPA: 3.6/4.0
Beijing Institute of Technology **2018.09-2022.06**
BSc in Computer Science and Technology, Xuteli School (Honors College of BIT) Average Score: 88.6/100 (rank: top 10%)

PUBLICATIONS

Deep Reinforcement Learning

- **[CCFA - ICDE]** Yuxiao Ye, Chi Harold Liu, et al., "Exploring both Individuality and Cooperation for Air-Ground Spatial Crowdsourcing by Multi-Agent Deep Reinforcement Learning," in *IEEE ICDE*, 2023.
- **[CCFA - JSAC]** Yuxiao Ye*, Hao Wang*, Chi Harold Liu, et al., "QoI-Aware Mobile Crowdsensing for Metaverse by Multi-Agent Deep Reinforcement Learning," in *IEEE Journal on Selected Areas in Communications (JSAC)*, 2024.
- **[CCFA - INFOCOM]** Zipeng Dai, Chi Harold Liu, Yuxiao Ye, et al., "AoI-minimal UAV Crowdsensing by Model-based Graph Convolutional Reinforcement Learning," in *IEEE INFOCOM*, 2022.

Text-to-SQL

- Bin Zhang*, Yuxiao Ye*, et al., "SQLBench: A Comprehensive Evaluation for Text-to-SQL Capabilities of Large Language Models," Submitted to *NeurIPS 2024*. Score: 86554
- Zhishuai Li*, Xiang Wang*, Jingjing Zhao*, Sun Yang*, Guoqing Du*, Xiaoru Hu*, Bin Zhang*, Yuxiao Ye*, et al., "PET-SQL: A Prompt-enhanced Two-stage Text-to-SQL Framework with Cross-consistency," *Arxiv Preprint*.
- Fangyu Lei*, Jixuan Chen*, Yuxiao Ye, et al., "Spider 2.0: Can Language Models Resolve Real-world Enterprise Text-to-SQL Workflows?," Submitted to *ICLR 2025*. Score: 8888

HONORS and AWARD

Grand Prize in "China Collegiate Computing Contest - AI Innovation Contest" (awarded 4/3400+) **2022**
National Scholarship (twice) **2023, 2024**
Outstanding Graduate Student, Beijing Institute of Technology **2023, 2024**
Outstanding Undergraduate Student, Beijing Institute of Technology **2022**
First-Class Academic Scholarship, Beijing Institute of Technology **2022, 2023**

RESEARCH EXPERIENCES

Research Assistant, Mobile Crowdsensing and Combinatorial Optimization by (MA)DRL **2021.06-Present**

- Proposed a MADRL framework, consisting of an intrinsic reward driven exploitation of individuality, enabling the accurate division of work, and a meta-learning based policy optimization, facilitating flexible agent's cooperation.
- Proposed a MADRL framework, with a traffic flow prediction mechanism based on spatial-temporal transformer, and a graph-based inter-agent communication method, to achieve efficient path planning for agents.
- Utilize transformer-based reinforcement learning to solve combinatorial optimization problems (particularly the two-echelon VRP), enhanced by a curriculum learning mechanism to mitigate non-stationarity among agents.

Intern, SenseTime Large Language Model Group **2023.12-2024.05**

- Constructed a new Text-to-SQL benchmark to mitigate overfitting in LLMs, conducted comprehensive evaluations on five Text-to-SQL sub-tasks across six LLMs, identified the distinct capabilities and limitations of LLMs, and proposed optimal in-context learning solutions tailored to each sub-task.
- Proposed an LLM-based Text-to-SQL framework, consisting of an enhancement of in-context learning and schema linking, and a cross-consistency mechanism across different models, which **achieves new SOTA results on the Spider benchmark with an accuracy of 87.6%**.

SKILLS

Programming: Python, C/C++/C#, Java, SQL, Matlab

Software: Pytorch, Tensorflow, Hugging Face Transformers, DeepSpeed

English Proficiency: IELTS 7.5
